PROFILE

Software Engineering student (COMSATS University Islamabad) and founder of a full-stack software agency serving US clients. Hands-on experience building and shipping production web applications in React, Next.js, and Node.js, alongside workflow automation (n8n) and technical SEO. Looking to bring practical, real-world development experience into a full-time-track internship.

EDUCATION

BS Software Engineering — COMSATS University Islamabad, Lahore Campus 2024 – 2028

CGPA: 3.60

FSc Pre-Engineering — Punjab Group of Colleges 2020 – 2022

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Java, Python, C++, SQL

Frontend: React, Next.js, HTML/CSS, shadcn/ui

Backend & Database: Node.js, NestJS, MySQL, SQL Server

Automation & Tools: Docker, n8n workflow automation, Git/GitHub, Google Search Console, AI SEO (GEO)

AI/ML: Generative AI application design, prompt engineering

EXPERIENCE

Founder & Full-Stack Developer — Strategeon Softwares Present

- Founded and run a full-stack software agency delivering custom web apps, SaaS platforms, and cloud systems for US-based clients, from discovery through launch and support.
- Shipped live client products including a restaurant QR-ordering platform, hotel booking system with Stripe payments, e-commerce storefronts, a healthcare appointment scheduler, a multi-account finance dashboard, and a logistics operations dashboard — using React, Next.js, Node.js, and PostgreSQL.
- Built a Hospital Management System with 18 modules using NestJS, Next.js, and SQL Server.
- Designed n8n automation workflows, including a Gmail automation and a LinkedIn automation that auto-publishes content and images.
- Managed technical and AI SEO for the company site, which now appears directly in Google AI Overviews for relevant SaaS-service search queries.

SELECTED PERSONAL PROJECTS

- Hospital Management System — Java, JavaFX, MySQL: multi-role authentication with patient, doctor, pharmacy, and billing modules.
- Chess Game with AI — Java: AI opponent using Minimax with Alpha-Beta pruning across 4 difficulty levels.
- Smart Navigation System — C++: route optimization system using Dijkstra's algorithm with traffic simulation.
- Weather App / Movie Search App / Digital Whiteboard — React & Next.js: real-time APIs, geolocation, Canvas-based drawing tools.

CERTIFICATIONS

- AWS Cloud Practitioner Essentials — Amazon Web Services
- Generative AI: Introduction and Applications — IBM
- Databases and SQL for Data Science with Python — IBM
- Programming with JavaScript — Meta
- Introduction to Android Mobile Application Development — Meta
- AI Infrastructure and Operations Fundamentals — NVIDIA
- Introduction to AI — Google
- Programming for Everybody (Python) — University of Michigan
